

2012-13 Seat Time Waiver Legislative Report

March 2013

Pursuant to Public Act 200 of 2012 (Sec. 903), the following is the Seat Time Waiver Report as required by districts that operate as a school of excellence cyber school as defined in the Revised School Code (Sec. 551), and districts that operate an alternative education program with a seat time waiver under the State School Aid Act (Sec. 101). This report contains information in response to the requirements listed in Public Act 200:

- a) Each district operating a program and the districts that enroll students in their program.

See the attached listing of districts operating a seat time waiver program and the districts that enroll students in their program as reported by The Center for Educational Performance and Information (CEPI), (Appendix A). Schools of Choice law applies to districts operating a seat time waiver program.

- b) The total number of students and membership pupils enrolled in each program.

See the attached listing of districts operating a seat time waiver program and the districts that enroll students in their program, which includes the total number of students and membership pupils enrolled in each program as reported by CEPI. (Appendix A)

- c) The district in which each pupil is enrolled if other than the district with the seat time waiver or the cyber school.

The data showing which district a pupil is enrolled in other than the district with the seat time waiver is indicated in the attached report as provided by CEPI and is indicated by the concurrent enrollment district for seat time waiver programs and the number of students where applicable in the attached report. (Appendix B)

- d) The district in which the pupil was enrolled prior to enrolling in the cyber school or the district with a seat time waiver program.

The data showing the district in which a pupil was enrolled prior to enrolling in the district with a seat time waiver and the number of students is reported in the attached document, (Appendix C), as provided by CEPI.

- e) The number of participating students who had previously dropped out of school.

According to the CEPI data, districts reported that 823 students had previously dropped out of school. (Appendix D)

- f) The number of participating students who had previously been expelled from school.

According to the CEPI data, districts reported that 79 students had previously been expelled from school. (Appendix D)

- g) The cost per pupil paid to each online education provider.

Attached is a list of the reported course providers and costs related to each of these programs reported out by district. The cost per pupil paid to each online education provider varies by district depending on local agreements with providers. As of this reporting period, this data includes districts that submitted data to the Michigan Department of Education (MDE). (Appendix E)

Also attached is a listing of the GenNET online course providers and consortium pricing available to school districts participating in the seat time waiver program through the Genesee Intermediate School District (GISD) seat time waiver program. (Appendix F)

- h) The cost per pupil charged to school districts that enroll their students in the program.

Attached is a listing of costs per pupil charged to school districts as reported by districts that enroll students in their program and includes available data submitted to the MDE by districts. (Appendix G)

- i) The name of each online education provider contracted by a district with a seat time waiver or a cyber school and the state in which the online education provider is located.

Listings of online education providers contracted by districts is provided within appendices E and F, indicating provider name and the state in which the provider is located, as reported by districts.

Summary

As of this reporting period, there are 196 local school districts/Intermediate School Districts (ISD), or Public School Academies approved to operate a seat time waiver. The reporting period for these data is from the first semester of 2012-2013. These data do not reflect full year data as the legislative report is due March 1, 2013. The GISD is also approved to operate a state-wide seat time waiver program and districts can participate through GISD as well. Of the 196, 167 reported data as a condition of the waiver by

the reporting deadline. The MDE will continue to work with districts that did not submit a report to collect data as a condition of the waiver. Failure to report may result in revocation of the waiver. Some districts approved to operate a seat time waiver may not have enrolled students in the program. Of those districts reporting, 7,850 students are reported as taking 100% of their classes off-site.

Districts report a wide range of costs (direct and indirect) for program implementation to the MDE. The factors contributing to these wide ranges are the number of courses taken by each student; whether the local school district provided Internet access and/or computer workstations; licensing and enrollment costs/structure variables by providers; and the level of mentor support needed by each student. (A student computer and broadband internet access are required to be offered too as indicated in Section 5-O-B of the Pupil Accounting Manual) There are also limitations of these data because schools report annualized costs as well as the costs incurred by the annual fall count date depending on implementation models and program offerings to students. In many cases, the data reported is variable, which may indicate that waiver recipients do not have a clear picture of their true expenses at this time and that there is a wide range of implementation options for districts.
